**Egypt Real Estate Trends
2024**

Know more..

Continuing on the momentum of our brand's focus on knowledge sharing, this year we lay on your hands the most comprehensive and impactful set of data ever released in Egypt's real estate industry.

We aspire to help our clients take key investment decisions with actionable, granular, and relevant data points.

The biggest challenge that faces Real Estate companies and consumers in Egypt is the lack of credible market information.

Most buyers rely on anecdotal information from friends or family, and many companies launch projects without investing enough time in understanding consumer needs and the shifting demand trends.

[Know more..](#) is our brand essence.

We are here to help companies and consumers gain more confidence in every real estate decision they take.

Executive Summary

Witnessing rapid changes in demand behavior and needs is a norm in today's world; however, combining the challenge of following the demand dynamics with major economic shocks such as steep currency devaluations makes real estate planning and accurate investment forecasting a near impossible mission.

The first section of this report details the results of our consumer trends survey and market observations. We start by laying out the demographics of our survey respondents, and then we detail their interests and needs in addition to showing how some of these consumer insights have evolved with time as we have been conducting these annual trends reports for more than 5 years now.

Perhaps, the most insightful part of this report is the Recent Trends section where we analyze the most pressing topics impacting the real estate market, and most important of all is the currency devaluation. We analyze the impact of the currency fluctuation and compare it with what happened in 2016, and we simulate different investment scenarios in different investment instruments and their outcomes. This section also includes a high-level look at listed Real Estate developers in Egypt, their revenue in both EGP and USD, and most importantly their profitability trends.

We have dedicated a full section to document the remarkable progress in the New Capital and its projects both Government Sector projects and Private Sector projects. Against all odds, the New Capital master plan is moving forward and life has officially started in this exemplary ambitious project.

The report concludes with a section dedicated to prices and heat map analysis to give those who are new to the market a snapshot view of Greater Cairo showing the high end communities and the pockets of intense demand that cause prices to skyrocket.

We are proud to see our annual trends evolve every year as we provide our customers and the industry stakeholders with deeper and more actionable insights that help them make more informed decisions.

Amad Almsaodi

CEO, AqarMap

Research Methodology

This report is based exclusively on our primary research and our proprietary data sources. All of our research activities are quantitative and electronic. Aqarmap mainly monitors and tracks 3 types of data trends:

- **Demographic & Socioeconomic Consumer Trends**

2 Million consumers use Aqarmap every month, and to use our service they must register their information in our database. As the consumers progress in the usage of the portal, we ask them bite-sized questions to collect demographic and socioeconomic information gradually. We also send seasonal surveys to the users to learn more about their insights on different topics and we link their responses to their profiles. Finally, we combine the users' profiles on Aqarmap with their profiles on Facebook to build the most holistic consumer profile that exists in the market to date.

- **Behavioral Consumer Demand Trends**

On top of the holistic consumer profile, we collect behavior-based consumer real estate preferences; such as: location, price, size, type, configuration, architecture, payment method, seriousness, frequency, and much more. We believe that there is a gap between what the consumer usually says they want, and what they actually do go after. Instead of asking the consumers what their price budget is for example, we simply monitor the prices of the properties they actually inquire about. This unique and close proximity to the consumer intent allows us to arguably understand the consumers more than they understand themselves.

- **Current and Historic Price Trends**

The majority of real estate developers in Egypt list their projects and units' prices on Aqarmap, and they regularly contact us to adjust their prices. Being at the center of this activity allows us to gain insights into pricing trends especially in new homes. In addition, we have thousands of brokers and private owners using Aqarmap to list new, resale, commercial, and rental properties. Every time a price gets increased or decreased, we record the movement and gain an insight. The number of days a property remains listed on Aqarmap before getting sold or removed combined with the number of views and leads each property gets in each different location helps us gain a deeper understanding of how price impacts demand. Socioeconomic segments were defined based on budget, income, job title, and residential address. However, budget was the factor with the heaviest weight. A segment are consumers searching for properties worth more than 10M EGP and C segment are consumers searching properties worth below 3M EGP and B segment are consumers between A & C segments.

Aqarmap Consumer Demand Index

Since 2012, Aqarmap has been publishing a monthly index that measures consumer demand for real estate in Egypt. This index is the most reliable and most referenced indicator in the market, and it is being followed closely by real estate investors, real estate companies, stock market analysts, government officials, and international organizations. It has been quoted in multiple international and local publications such as: Bloomberg, Reuters, Oxford Group, Global Property Guide, Arab African Bank Securities, UN Habitat, American Chamber, and numerous economic publications. The index has reliably measured the demand during monumental political and economical inflection points in 2013, 2016, 2020, 2022 and 2024.

While the overall trajectory of demand in Egypt for the past 12 months has been upwards, the growth in demand accelerated in Q3 and Q4 of 2023, driven mainly by consumers and investors flocking to Real Estate as a safe haven while the Egyptian currency was facing a steep decline against the USD. However, this trend took a different direction at the end of Q1 2024. In March 2024, the demand index dropped significantly, recording a decline of 8% compared to the month before, and this decline was mainly caused by the floatation of the EGP by the central bank and the erosion of the gap between the official exchange rate and the black market rate. Also, there is no doubt that the arrival of the holy month of Ramadan contributed to the decline, as demand usually decreases during Ramadan.

The index computational algorithm is proprietary and it utilizes a combination of data points from Aqarmap, online search engines, macro economic indicators, and publicly listed developers financials and KPIs. The index does not measure the fluctuation of prices, but rather the dynamics of consumer demand. Having direct access to the behavior of 2,000,000 buyers monthly combined with the ability to evaluate the dynamics of more than 250,000 properties listed by developers, brokers and private individuals gives Aqarmap an exclusive market visibility.

Aqarmap Index

Real Estate Development Cost Structure

* The data in this analysis is generalized for illustrative purposes only.

* Every developer and every project tends to have a different financial composition

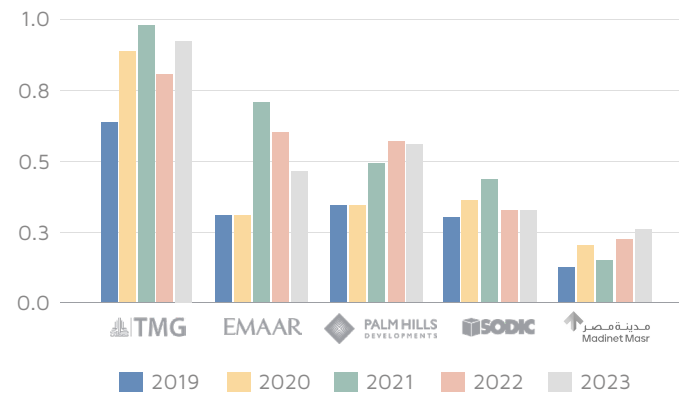

Publicly Listed Developers

Revenue & Profitability

Revenue (Billions EGP)

Revenue (Billions USD)

Profitability

- 💡 Revenue of most developers grew significantly in EGP.
- 💡 Revenue of most developers remained stable in USD.
- 💡 Emaar remains the most profitable developer.
- * Currency exchange rate used as of 31 December 2023

Publicly Listed Developers

Revenue & Profitability

■ Revenue (Billions EGP) ■ Revenue (Billions USD) — Profitability

💡 Total revenue of selected developers is increasing, USD revenue is stable, while average profitability is fluctuating.

Developer Sales History in EGP vs USD ?

- * Based on a basket of publicly listed developers (Talaat Mostafa - Emaar - Palm Hills - Sodiq - MNHD)
- * Currency exchange rate used as of 31 December 2023

Construction Cost Increase (Iron)

Iron Ton USD

Iron Ton EGP

* Data updated annually on April 2024, and on July in the previous years.

* Official floatation by Egyptian Central Bank

▲ Q4 2016 (+105%) ▲ Q1 2022 (+56%) ▲ Q1 2023 (+24%) ▲ Q1 2024 (+59%)

The impact on construction costs in EGP in 2022/2023 due to the floatation is much higher than the impact of the 2016 floatation as noted in the EGP graphs, mainly because in 2016, the devaluation rate was lower and the international prices in USD were either flat or dropping.

Construction Cost Increase (Cement)

Cement Ton USD

Cement Ton EGP

* Data updated annually on April 2024, and on July in the previous years.

* Official floatation by Egyptian Central Bank

▲ Q4 2016 (+105%) ▲ Q1 2022 (+56%) ▲ Q1 2023 (+24%) ▲ Q1 2024 (+59%)

The impact on construction costs in EGP in 2022/2023 due to the floatation is much higher than the impact of the 2016 floatation as noted in the EGP graphs, mainly because in 2016, the devaluation rate was lower.

Dollar, Black Market & Real Estate

— USD Official Rate - - USD Black Market Rate — PPM Cairo EGP

Floatation by Egyptian Central Bank ▲ Q4 2016 (+105%) ▲ Q1 2022 (+56%) ▲ Q1 2023 (+24%) ▲ Q1 2024 (+59%)

The growth in Real Estate prices lagged the change in dollar value during the 2016 devaluation, but the average price per meter for a unit in Cairo eventually caught up with the USD and surpassed it in the following years. The 2022/2023/2024 consecutive devaluations eroded the property value appreciation in USD terms, but then again the market caught up and actually overshot the USD prices under anticipation of further devaluation. We expect the prices to get reduced significantly during 2024 as developers backoff the embedded hedging that they incorporated lately.

Real Estate prices in USD

— PPM Cairo USD Official ••• PPM Cairo USD Black Market

Floatation by Egyptian Central Bank ▲ Q4 2016 (+105%) ▲ Q1 2022 (+56%) ▲ Q1 2023 (+24%) ▲ Q1 2024 (+59%)

Measuring Real Estate prices in USD is a much more accurate assessment of real value. In the 2016 devaluation, it took the average property in Cairo around 3 years to recover its value in USD, in the recent devaluation, the market moved faster and took only 2 years to recover its value, however, prices are expected to go down during 2024 in EGP basis and therefore, the catchup period might stretch up to 3 years just like in 2016.

Dollar Impact on Prices

New Cairo

Nasr City

Madinaty

Mivida

Dollar Impact on Prices

Sheikh Zayed

6th of October

Alexandria

Measuring Real Estate prices in USD is a much more accurate assessment of real value. In the 2016 devaluation, it took the average property in Cairo around 3 years to recover its value in USD, in the recent devaluation, the market moved faster and took only 2 years to recover its value, however, prices are expected to go down during 2024 in EGP basis and therefore, the catchup period might stretch up to 3 years just like in 2016.

R3

Government Development

2019

2021

2024

R3 Residential District is also called "Capital Residence". R3 is a residential complex in the New Capital, consisting of 61 residential buildings of more than 25,000 housing units, divided to 6 different models, on a total built up area of 30,500 m². It is the first residential neighborhood that was implemented by the Urban Communities Authority. The third residential district, R3, has various services, including restaurants, cafes, pharmacies, and commercial markets.

Source: Historical satellite images powered by Esri

R5

Government Development

2019

2021

2024

R5 Residential District, is one of the largest residential neighborhoods in the New Capital, as it extends over an area of 850 acres, 80% of which has been allocated to green spaces. It also includes a large number of residential units estimated at about 22,500 residential units, between residential buildings, mixed housing, villas, townhouses, and twin houses. It also provides many basic facilities and services, such as schools, hospitals, commercial centers, green spaces, and recreational areas.

Source: Historical satellite images powered by Esri

R7

Private Sector Development

2019

2021

2024

R7 Residential District is spanning over an area of 1,500 acres. It also includes many compounds and residential projects, in addition to various service and commercial facilities. The district is located near many important landmarks in the New Capital, such as the Government district, the Ministerial district, the Presidential Palace, and the Diplomatic district. It is also close to Medical City, Train Station, Conference Center, Al Fattah El Aleem Mosque, Cathedral of the Nativity, Opera House, and the City of Arts and Culture.

Source: Historical satellite images powered by Esri

R8

Private Sector Development

2019

2021

2024

R8 Residential District is being developed by private sector companies in the New Administrative Capital. It is located in the southwestern part of the city near the Government District and Green River. It is planned to be an integrated community offering a variety of housing options, facilities, and amenities. The total area is about 2,500 acres, only 20% of which is allocated for buildings and the rest of the area is for landscaping. R8 is considered the closest neighborhood in the city to the New Capital International Airport.
